Dana DSH40 - 3.25 Single Reduction Tandem Drive Axle

Pro Gear's Dana Single Reduction Tandem Drive High Performance Series Parts Manual to assist in identifying your Dana axle.

If you need any assistance identifying the correct axle unit for your truck and equipment, contact your Dana replacement part specialists at Pro Gear and Transmission.

Pro Gear and Transmission has same day shipping and 1000's of products in stock and ready to ship internationally for your next project.

For parts or service contact the Dana Axle specialists at Pro Gear & Transmission, Inc.

Models

The following models are represented in this publication.

Single Reduction Models

Forward Axle	Rear Axle	Axle Capacity	Gear Size
DSH40(P)	RSH40	40,000 Lbs	15.675" Hypoid Gear
DSH44(P)	RSH44	44,000 Lbs	15.675" Hypoid Gear

Single Reduction Models W/Wheel Differential Lock

Forward Axle	Rear Axle	Axle Capacity	Gear Size
DDH40(P)	RDH40	40,000 Lbs	15.675" Hypoid Gear
DDH44(P)	RDH44	44,000 Lbs	15.675" Hypoid Gear

Single Reduction - Single Axle Applications

Model	Axle Capacity	Gear Size
22060SH	40,000 Lbs	15.675" Hypoid Gear

General Information

How To Use Illustrated Parts List

Ordering Parts

- This parts book is organized in sections according to parts servicing requirements. Use the Contents or page headings and colored tabs to find information.
- Use this book to order parts for your Spicer® Axle.
- For convenience, part numbers have been included for all pieces of the carrier assembly. Some of these parts, such as the carrier and caps, are serviced only in kits or assemblies. Part numbers are for your reference only. Those parts not serviced separately are identified with NSS.

Kits and Assemblies

- Kits and Assemblies contain groups of individual or assembled parts developed for optimal replacement or repair of a service problem.
- Kits and Assemblies are shown with applicable parts groupings in the parts listing.
- See the Appendix for detailed information concerning kits applicable to this model.

Abbreviations

- **AR - As Required** - Parts that vary in quantity with each axle. Example: shims
- **NSS - Not Serviced Separately** - Items which can only be purchased in sets, kit form or service assemblies. Example: brake shoes.
- **RH/LH - Right Hand/Left Hand** - Determined as viewed from behind the vehicle looking forward.
- **“RTV” - Gasket Compound** - Formed-in-place gasket sealer. It is recommended for use on all surfaces requiring a gasket.
- **Assy - Assembly**

- **Brg - Bearing**
- **Diff - Differential**
- **Hsg - Housing**
- **Inv- Involute**
- **IASS - In Axle Speed Sensor**
- **ABS - Antilock Brake System**
- **N/A - Not Applicable**
- **Str- Straight**

Illustrations

- Illustrations show parts in assembly groups.
- Item numbers on illustrations correspond with parts listings on pages that accompany the drawings.
- Notes are included on illustrations where needed.

Parts Listings

- Parts listings are defined by parts groupings and are broken down by service assemblies.
- Parts Listings identify a part for servicing with the following categories:
 - **Item** - corresponds with numbers on illustrations for part identification
 - **Description** - specifies part name or description
 - **Quantity (Qty)** - quantity required for assembly
 - **Current Part** - service part numbers are broken down by model, type or other applicable information
 - **Notes** - define unique characteristics or replacement notes
 - **Kits / Assy's Where Used** - indicates Kits or Assemblies that contain a particular part
- **Other pertinent information is listed in tables or parts listings as required.**

Effectively Using a Parts Listing—Example

- Follow the example below to locate and order exactly what is required for servicing.

Match to items on illustration	Use to identify Part	Order this quantity for servicing	Order Part Number by Model indicated		Indicates information important to ordering or use
Item	Description	Qty	DSH40(P) DSH44(P)	DDH40(P) DDH44(P)	Notes
7	Brg Cup - Plain Half	1	129566 •	015092 •	
8	Brg Cone - Plain Half	1	129565 •	128604 •

	BASIC OVERHAUL KIT	510393	510393	Contents Identified with •

Model Identification

Locating Model Designation Information

- Axle Model Identification, Part Number and Serial Number are located on a tag at the axle centerline. This information will help to locate information in this book and to identify the correct parts for servicing.

Drive Axles

- **Model Number, Part Number and Serial Number** are located on the data plate on the axle centerline

Drive Axle Assembly Tag

1. The OEM part number assigned to the axle build.
2. The specification number assigned to the axle build by Spicer. The spec number will identify all the component parts of the axle as built by Spicer, including special OEM requirements such as yokes or flanges.
3. The axle model identification.
4. The production or service part number of the carrier assembly.
5. The gear ratio of the axle.
6. The serial number of the carrier assembly assigned by the manufacturing plant.

Note: When inquiring about specific information on your axle, write down all of the above information from your tag and call your local OEM dealer or your Dana representative.

7. Country of Origin

- The axles illustrated in this book are specified with a variety of different axle shafts, according to OEM specifications. **When ordering replacement axle shafts, note the part number stamped into the flange.**

Using Model Designation to Identify Axle Components

- The Axle Model Identification number contains information that is important to understand when purchasing service parts or new components. The Model Identification number provides important vehicle, capacity and application information and model features. Use this guideline to understand your Axle Model Identification. If you need assistance, contact your Dana representative.

Note 1: On June 3, 2002, the design of carrier mounting flange of the DSH40(P), DSH44(P), DDH40(P), DDH44(P) and RSH40, RSH44, 22060SH, RDH40 and RDH44 models changed. The new carrier's are designed with a "Thick Flange". Carriers designed with a "Thick Flange" require the use of "long" capscrews. The fastening hardware for these models can be found on pages 16-18 of this IPL. Refer to Spicer bulletin ABIB-0210R1 for further details.

70	Jam Nut	1	210184	210184	
71	RTV - Sealant	1	107276S •	107276S •	Not Illustrated

Note 2: On June 3, 2002, the design of the power divider cover changed. The original PDU covers (P/N: 129572) have 9 holes and require 9 fasteners. The current design PDU covers (P/N: 130823) have 11 holes and require the use of 11 long fasteners. The new 130823 PDU covers now replace the 129572 covers in service.

- The 9-hole PDU cover will NOT work on a carrier machined with 11 holes.
- A new 11-hole PDU cover will adapt to a 9-hole carrier without modifications. Refer to Spicer bulletin ABIB-0210 for further details.

Wheel Differential Lock Assembly

Rear carrier illustrated above. Parts for forward carrier are identical to the rear carrier.

24	RTV - Sealant	1	107276S •	Not Illustrated, 3 oz. Tube

• Included in Bearing & Basic Overhaul Kits

NSS - Not Sold Separately

Carrier Mounting Flange Design Change

Beginning June 3rd, 2002, the nominal thickness of the carrier to housing flange was increased in the DSH40(P), DSH44(P), DDH40(P), DDH44(P) and RSH40, RSH44, 22060SH, RDH40 and RDH44 models. This change required the use of new fastener parts. A new (45mm) capscrew (P/N 130836) was released as it replaced both 210173 and 130158 old design capscrews. Additionally, a much thicker boss was added to the flange at the 12:00 & 6:00 o'clock positions. These new thicker flange bosses require an even longer (70mm) capscrew (P/N 130837). A thicker and larger diameter flat washer (P/N 130877) was also released as part of this upgrade. The new washer replaces existing washer 29804. The existing stud (P/N 127641) and nut (P/N 127567) are not affected by these changes and will continue to be used.

SERVICE CARRIER NOTE:

Stock levels of both early design service carriers and new "Thick Flange" design service carriers exist. If you have a vehicle that was originally equipped with a Spicer axle built with the "Thick Flange" carrier design, it can be universally serviced with an early style (Thin Flange) Service Carrier. The repairing dealer must simply make sure to use the correct axle housing hardware parts when installation is done. New service carriers built with the thick flange design, will include the necessary thick flange hardware kit to minimize any down time to the customer.

- Differentials with "THICK FLANGE" carriers use axle housing hardware kit (P/N 512087).
- Early design differentials with "THIN FLANGE" carriers use axle housing hardware kit (P/N 511600).
- GM Vehicles requires the use of double-ended capscrews at the housing fastener location. Double-ended capscrews for thick flange design carriers are not available at this time. GM vehicles must be serviced with early design carriers, available only through GM.

New Axle Housing Fasteners

IMPORTANT!

Spicer does not recommend the mixing of various designs carrier-to-housing capscrews on the same assembly. Whether mixing or not, torques must be measured using a calibrated torque wrench.

Failure to re-torque bolts and nuts to proper specifications may lead to carrier to housing leaks and possible component damage.

Axle Housing Fasteners

On June 3, 2002 the DSP40(P), DSP 41(P), DDP40(P), DDP41(P), RSP40, RSP41, RDP40 and RDP41 models were upgraded to the new "Thick Flange" carrier design as fully detailed in Spicer bulletin AXIP-0210R1. Shown below are the axle housing hardware kits and fastener locations for both variations. View fastener locations as if installing differential into the axle housing.

Thick Flange – After 6/3/02

Original Design Flange – Before 6/3/02*

Note: GM models require a special double-ended capscrews. They continue to use carriers with the original design thin flange. At this time Spicer does not have a double-ended capscrew for "Thick Flange" models.

A – 127641 Studs & 127567 Nuts
 B – 130836 Capscrews – Short (45 mm)
 C – 130837 Capscrews – Long (70 mm)
 D – 130877 Flat Washers – All Locations

512087 Hardware Kit (Thick Flange)

Part No.	Qty.	Description
107276S	1	RTV Sealant 3 oz. Tube
127567	4	Nut
127641	4	Stud
129293	1	Loctite 271 0.5 ml. Tube
130836	8	Capscrew (45 mm) - Short

Casting & Service Parts Cross-Reference Listing

Below are two helpful cross-reference charts. Chart-A shows "casting" numbers that can quickly identify the old design parts versus the new design parts. Chart-B is a "service parts" cross-reference listing. The part numbers in this chart are sorted by part type; refer to the "New Part Description" column.

Chart A: Part Number Cross-Reference - Casting Numbers

New Casting Part No.	Old Casting Part No.	Description	Model
130809	129539, 129540	Diff. Carrier Casting	DSP40, DSP 41
130814*	129550	Diff. Carrier Casting	DDP40, DDP40-P, DDP41, DDP41-P
130819*	129551	Diff. Carrier Casting	DSP40-P, DSP 41-P
130822	129571	PDU Cover Casting	All "D" Forward Carriers - 11 hole
130824	129351C, 129541	Diff. Carrier Casting	RSP40, RSP41
130827*	128600	Diff. Carrier Casting	RDP40, RDP41

* New Thick Flange Carriers not in production yet, production to start 1st quarter 2003.

Chart B: Part Number Cross-Reference - Service Parts

Current Service Part No.	Replaces Old Service Part No.	New Part Description	Notes
511600	None	Axle Hsg hardware Kit - Thin Flange Models	Use only in Models with Thin Flange Carrier Design
512087	None	Axle Hsg hardware Kit - Thick Flange Models	Use only in Models with Thick Flange Carrier Design
130836	130158, 210173	Capscrew - 45 mm	Use in All Models (New & Old Design)
130837	None	Capscrew - 70 mm	Use only in Models with Thick Flange Carrier Design
130158	NLA	Capscrew - 40 mm	Replaced by 130836 Capscrew
210173	NLA	Capscrew - 40 mm	Replaced by 130836 Capscrew
130877	29804*	Flat Washer	Use in All Models (New & Old Design) - *Old Part Not Obsolete
29804*	None	Flat Washer	Used only in Brake Assemblies - *Part Not Obsolete
130823	129572	PDU Cover - 11 hole	All "D" Forward Carriers (new cover uses 11 capscrews)
129572	NLA	PDU Cover - 9 hole	Replaced by 130823 PDU Cover
510023	Refer to Note 1	Carrier & Cap Kit	DSP40, DSP41
510024		Carrier & Cap Kit	DSP40-P, DSP41-P
510027		Carrier & Cap Kit	DDP40, DDP41
510028		Carrier & Cap Kit	DSP40-P, DSP41-P
510017		Carrier & Cap Kit	RDP40, RDP41
510018		Carrier & Cap Kit	RSP40, RSP41

Note 1: The Carrier & Cap kits have been optimized for service. New design carriers and hardware will be provided in kits when various model options are released through production.

Axle Shafts

Axle shafts are used in “sets”, have unequal shaft lengths and may be “location specific” or “Wheel Equipment specific”.

DO NOT MISPLACE AXLE SHAFTS FROM THEIR INTENDED LOCATION.

Note: STR - Straight, TPR - Tapered

Axle Shafts - Single Reduction Models

Gear & Pinion Kits

Dana has highly developed primary axle gearing which is only used in matched sets. These sets are identified by the mating parts listed below. Within any Dana production drive axle or genuine Spicer® Gear & Pinion service kits, these mated part numbers will appear. Because they are developed as a set with precision machining, never mix gears and pinions from different mated sets within an axle. Shortened gearing life, noise and failure may occur. Always use genuine Spicer® products

Oil Seal Installation Tools

This kit contains installation tools used for installing drive axle oil seals. Using these tools ensures proper installation of the seal. Failure to use these tools may result in an improperly installed or damaged seal.

Oil Seal Driver Installation Kit 217414

D-Input

Use 126917

126917

D-Output

Use 126917 and 128706

126917

+

128706

R-Pinion

Use 126917

126917
